

Amendments to the Claims

This listing of the claims will replace all prior listings or versions of the claims in the application:

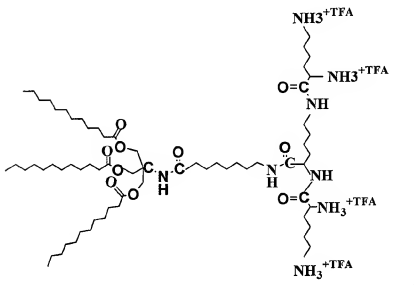

Listing of Claims

1. (Currently Amended) A method of treating a solid tumour in a subject, the method comprising the following steps

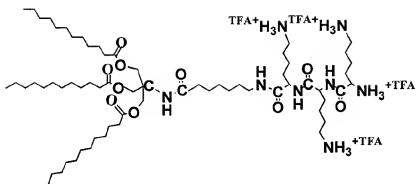

(i) delivering to the solid tumour

(a) a composition comprising an engineered ovine adenovirus comprising a probain promoter and a transcriptional enhancer sequence (PSME) operatively linked to a nucleotide sequence encoding a purine nucleoside phosphorylase (PND) enzyme, and

(b) a CS87 lipid having the formula

or a CS60 lipid having the formula:

and

- (ii) administering a ~~prodrug~~ 6-methyl purine-2-deoxyriboside (6MPDR) or fludarabine to the subject to the subject;

~~wherein the engineered ovine adenovirus comprises a promoter and a gene encoding an enzyme which converts the prodrug to a cytotoxic metabolite, the gene being under the control of the promoter.~~

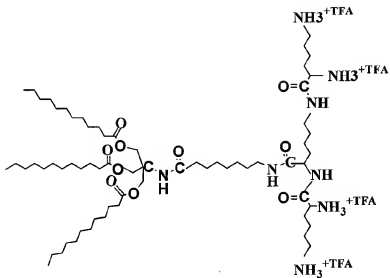

2. (Canceled)
3. (Previously Presented) A method as claimed in claim 1 in which the solid tumour is prostate cancer.

Claims 4- 28. (Canceled)

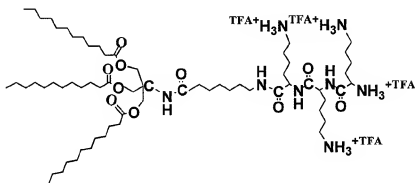

29. (New) A composition comprising:

- (i) an engineered ovine adenovirus comprising a probasin promoter and a transcriptional enhancer sequence (PSME) operatively linked to a gene encoding a purine nucleoside phosphorylase (PNP) enzyme; and

(ii) a CS87 lipid having the formula:

or a CS60 lipid having the formula:

30. (New) A composition as claimed in claim 29, further comprising 6-methyl purine-2-deoxyriboside (6MPDR) or fludarabine.
